

Melvin Paul

Product Manager | Payments, Enterprise Systems & Workflow Products

London, Canada • 437-286-9635 • melvinpaul950@gmail.com

PROFESSIONAL SUMMARY

Product Manager with 8+ years of experience leading enterprise software products in payments, analytics, and workflow automation. Brings 2+ years of end-to-end product ownership across discovery, roadmap definition, and Agile delivery, with scope spanning 3M+ monthly transactions and 12 enterprise accounts.

PROFESSIONAL EXPERIENCE

Product Manager, Pay

LBMX | London, Canada | Apr 2024 – Jun 2026

- Own end-to-end strategy and delivery for AR/AP payment workflows supporting 12 enterprise accounts and 3M+ monthly transactions with audit-ready financial traceability
- Define and prioritize requirements for invoicing, disputes, payment terms, and write-off workflows by translating financial processes into structured product specifications
- Lead Agile execution with engineering teams across backlog prioritization, sprint planning, and iterative releases
- Run discovery and validation cycles using customer feedback, Figma, and AI-assisted prototyping to refine workflow usability
- Built an internal AI-powered workflow system integrating SOWs, Mixpanel, support tickets, and Jira as live knowledge sources, automating PRD generation into Confluence and enabling edge case stress testing against full Jira history before development intake
- Redesigned invoice search and validation workflows, reducing invoice processing effort by 35% and improving pre-payment accuracy and operational efficiency

Product Manager, Special Projects

LBMX | London, Canada | Jan 2024 – Mar 2024

- Led discovery of cross-functional operational problems across Sales, Support, and Operations and translated them into prioritized product opportunities
- Built an EDI Control Centre to monitor 400+ daily document transactions, providing real-time visibility, centralized error reporting, and configurable alerting across supplier and member workflows.
- Identified opportunities to improve customer support workflows through conversational AI, influencing development of a native AI assistant initiative
- Led exploration of AI-assisted translation workflows to improve localization of product phrases and customer-facing content for French-speaking users

Senior Product Analyst

LBMX | London, Canada | Apr 2023 – Jan 2024

- Evaluated third-party analytics vendors and led selection and implementation of a pivot table tool, assessing performance, scalability, and current tech stack compatibility, resulting in a solution customers adopted for self-serve data exploration and cross-product reporting with web-based data saving
- Partnered with AI teams to design privacy-conscious workflows that anonymized customer data before processing via OpenAI API, mapping responses back into the application while optimizing token usage efficiency.
- Built dashboards and reporting systems for Support teams to surface operational gaps and support traffic patterns, directly enabling more proactive resource allocation and project prioritisation decisions
- Conducted market research, customer analysis, and competitive assessments to identify product opportunities

- Supported PIM initiatives through dynamic product enrichment using external data sourcing and automation workflows

Analytics Product Owner

Kudos Inc | Alberta | Aug 2021 – Mar 2023

- Led delivery of a rewards analytics platform serving 6 enterprise organizations including one with 1,000 users across 100 departments, enabling reward distribution tracking, department-level performance correlation, and organizational impact measurement
- Implemented role-based access across manager and employee tiers to support performance analysis workflows across 3,500+ total users

BI Analyst | LBMX | Jun 2019 – Aug 2021

- Built vendor-facing dashboards providing visibility into received goods, rebate amounts, and rebate structures, enabling vendors to assess member purchasing behaviour, track terms performance, and identify delayed or slowing payments
- Gave buying groups actionable insight into member behaviour and rebate program effectiveness, creating opportunities to amend programs based on real purchasing and payment data

BI & Front-End Developer | LBMX | Apr 2016 – May 2019

- Eliminated manual cross-system reporting for smaller members who previously consolidated data across ERPs and accounting software, replacing fragmented processes with centralized visibility into all LBMX activity
- Enabled members to export and merge LBMX data with their own systems for self-serve analytics, removing dependency on external tools for routine reporting

PROJECTS

AI-Powered Structured Learning Platform

Personal Project | 2024 – Present

- Built an AI-powered learning platform that generates personalized courses in under 2 minutes based on a user's goals, intent, and knowledge level.
- Designed a diagnostic workflow that infers user proficiency without self-assessment
- Created interactive learning experiences using decision-based scenarios and a context-aware AI mentor
- Built using React, Node.js/Express, Supabase PostgreSQL, Claude API, and Server-Sent Events

EDUCATION & CERTIFICATIONS

- University of Waterloo – Data Science Certificate (2022–2023)
- University of Waterloo – Machine Learning & Big Data Management Systems (2023)
- Financial Analysis Fundamentals – Corporate Finance Institute (2026)
- Accounting Fundamentals – Corporate Finance Institute (2025)
- Certified Scrum Master (CSM) | Certified Scrum Product Owner (CSPO) – Scrum Alliance (2022)
- Fanshawe College – Advanced Diploma, Internet Web Development (2016)

TECHNICAL SKILLS

Product: Product Strategy, Roadmapping, Product Discovery, Agile/Scrum, Stakeholder Management, Cross-functional Collaboration, OKRs/KPIs, User Story Mapping

Data: SQL, Data Analysis, ETL Concepts, Reporting Systems, Analytics

Tools: Jira, Figma, Snowflake, Sisense, Tableau, Confluence

AI/ML: AI Workflow Design, Prompt Engineering, Token Optimization, Data Privacy Workflows, Workflow Automation, AI Product Discovery
